

Declaration on the usage of scientific data in the project „BUFF“ Instructions on data privacy

The Department for Perceiving Systems at the Max Planck Institute for Intelligent Systems is providing you scientific data that was recorded in our project „KlothCap“. The data underlies restrictions named in this document. We are handling the individual data of our participants with greatest care. We expect that you as members of the scientific community do the same.

The participant's data underly the german data privacy law.

The data is restricted for you to use internally within your scientific institution for scientific purposes.

You are not allowed to forward or distribute the data.

Specifically it is not allowed to make the individual data of participants in this data collection publically accessible.

If you publish findings in connection with our data, please cite:

Zhang, C., Pujades, S., Black, M., & Pons-Moll, G. (2017). Detailed, accurate, human shape estimation from clothed 3D scan sequences. IEEE Conference on Computer Vision and Pattern Recognition (CVPR).

The rights of the data remain at the Max Planck Institute for Intelligent Systems, Perceiving Systems Department.

The data includes the individual data of the following participants with the IDs:

00005 (if published, the face must be blurred)
00032
00096
00114 (if published, the face must be blurred)
03223

The participants have the right to withdraw their data from further use at any time. The Department of Perceiving Systems at the Max Planck Institute for Intelligent Systems will inform you in such cases.

Confirmation

I hereby declare that I

- will only use the data for the purposes indicated.
- will not forward or distribute individual/personal data.
- will block or delete withdrawn data from further use if I am told to do so.
- will cite the above mentioned paper.
- will blur faces for the indicated ID cases if I am publishing data.
- have understood the permissions and restrictions named above.
- confirm that I have read the information form carefully. I was informed about the importance of data privacy.
